## DETAILED ACTION

### *Election/Restrictions*

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-14, drawn to a substrate for a semiconductor device, classified in class 361, subclass 765.
- II. Claims 15-21, drawn to a semiconductor device, classified in class 257, subclass 678.
- III. Claims 22-28, drawn to a method of making a semiconductor device, classified in class 438, subclass 113.

The inventions are distinct, each from the other because of the following reasons:

Inventions III and I, II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the semiconductor device (claims 15-21) could be made by processes other than the claimed process (claims 22-28), such as dicing the substrate first, then mounting and sealing the chip; or mounting the chip, dicing the substrate, then sealing the individual mounted chips. Invention I does not complete the semiconductor device by separating the substrate into individual semiconductor devices.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group III is not required for Group I or II, and the search required for Group II is not required for Group I, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
